

Command and Control Centre (C3)

System Integration

Control Centre Environments

Perfect Visual Solutions

System Integration

Jumbo Vision provides a full concept through support service for your next C3. Involvement with both management and the operators is vital, and will ensure that all aspects, such as visual displays and ergonomic human factors, are considered and incorporated into a proposal. We are able to provide 3D walkthroughs allowing you to determine effective layouts and use of space, and by combining our skills with leaders in the industry, we are able to become an all-in-one solutions provider for system integration in Australia and overseas.

Control Centre Environments

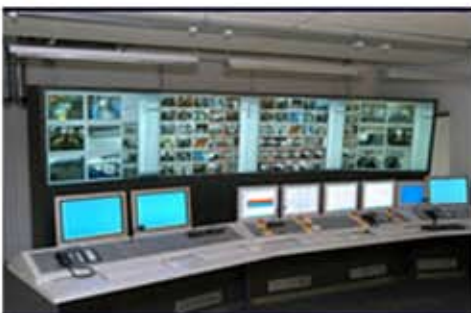

Evans' consoles are unparalleled in the control room industry when it comes to innovative designs, ergonomic considerations and overall quality and durability.

Their consoles have been designed and manufactured to withstand the most demanding 24/7 and mission critical technology-intensive environments while ensuring maximum operator effectiveness. Thousands of hours have been involved in ensuring the console designs exceed industry standards and clients' expectations
